

Mini-K

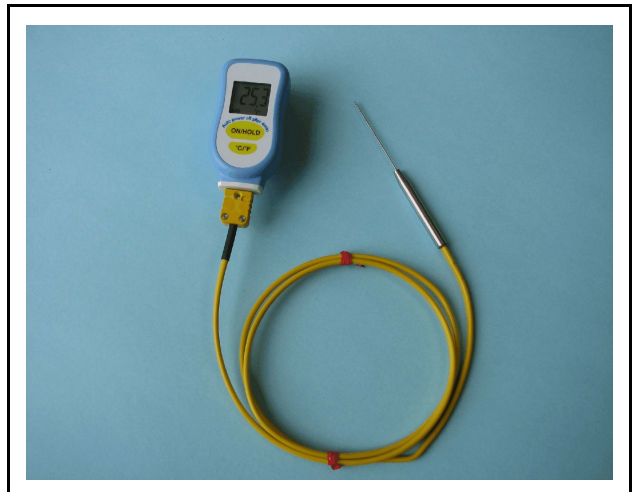

Pocket sized and handy thermometer with a large display for all type K sensors with mini-plugs.

In most cases it is all that is needed for a quick measurement. It is much easier to carry than the conventional large thermocouple thermometers.

The functions include auto shut off or hold, battery status indicator and choice between °C or °F.

MINI -K

Type K Thermometer with connector for yellow mini plug

Specification:

Dimensions: 78 x 43 x 20mm. Weight : 40 grams

Measuring range -64 to +1400°C
